This EASY LED universal model adjusts easily to aquariums with glass of a thickness not exceeding 6 mm. The fixing bracket has a flexible device that allows the positioning of the lighting up to a 90-degree angle, which allows easy access to the inside of the aquarium. LED technology guarantees the high quality of the light emitted, due to its high power, and the low voltage makes it safer. It also allows very low power consumption and ensures a longer life for the lightning. All these advantages offer the fish and plants numerous benefits for their growth and well-being.
