LUMINUS APP

IOS DEVICES | ANDROID ADVICES

Through the Luminus App, the user has access to the Storm function, which simulates a storm environment in the aquarium.

The Luminus - Smart LED Controller allows you to program the operating time of LED light units, controlling all parameters independently and as desired by the user.

With two independent channels (max. 5A per channel) with four light intervals each, allowing creating the daylight with sunrise and sunset effect, turning the light units on and off gradually (between 10 and 90 minutes). It is also possible to create the night mood in the aquarium, by adjusting the light intensity (10 to 100%). Compatible with all Tecatlantis products.

Input/Output: 12VDC to 24VDC, Ø2.1 DC Socket
CH1: INPUT/OUTPUT max. 5A; CH2: INPUT/OUTPUT max. 5A
