This EASY LED TORTUM universal model adjusts easily to any tortum tank glass/wood up to 6 mm thick. The fixing bracket has a flexible device that allows the positioning of the lighting up to a 90-degree angle, which allows easy access to the inside. LED technology guarantees the high quality of the light emitted, due to its high power, and the low voltage makes it safer. It also allows very low power consumption and ensures a longer life for the lightning.
