001 **11613**

EASY LED CONTROL 1plus is a device which allows the EASY LED and EASY LED UNIVERSAL lighting to have more autonomy, allowing the operation to be programmed. The controller is connected to the power supply and programmed with the times for the lighting to switch on and off. At the scheduled time, the light unit will turn on and off gradually, simulating the effect of the sunrise and the sunset. It also includes a light intensity regulator (0% to 100%).

Input / Output : 12 VDC to 24 VDC, Ø2.1 DC Socket
Max Current: 5A
