

# B-BOX /L

## ECOLOGICAL CARTRIDGES

Filter media available for **BIOBOX** and **BIO FILTER ULTRA\***

Modular Cup L / Cod. 21520

### COARSE FOAM / FINE FOAM

MECHANICAL FILTRATION

#### COARSE FOAM

Works as a pre-filter, retaining the existing waste water. For better efficiency, clean it with water from the aquarium once a month.

#### FINE FOAM

Works as a pre-filter, retaining the smallest residues in the water. For better efficiency, clean it with water from the aquarium once a month.

Recommended replacement **EVERY 3-5 MONTHS**

21412 - Coarse Foam

21413 - Fine Foam

### BACT LIFE\*

BIOLOGICAL FILTRATION

Creates ecosystem between fish and plants. Consumes amonium/ammonia and nitrites. Provides more space for nitrifying bacteria.

Recommended replacement **EVERY 5 MONTHS**

21411 - Bact Life

### PURE WATER\*

CHEMICAL FILTRATION

Helps keep water crystal clear. Prevents and eliminates colours, odours, chlorine, chloramines and toxic metals. NOTE: in the case of fish treatment, this filter media must be removed.

Recommended replacement **EVERY MONTH**

21410 - Pure Water

### ANTI ALGAE\*

CHEMICAL FILTRATION

Very effective filtration to fight and reduce unwanted algae. It absorbs phosphates, nitrates and ammonia. NOTE: in the case of fish treatment, this filter media must be removed.

Recommended replacement **EVERY 2 MONTHS**

21409 - Anti Algae

### CLEANWATER\*

CHEMICAL FILTRATION

Ultrafiltration which keeps the aquarium glass and surface clean for longer, helping to create ideal conditions for fish. Reduces organic material, absorbs and retains phosphates, nitrates, nitrites and ammonia. Good results after two weeks. NOTE: in the case of fish treatment, this filter media must be removed.

Recommended replacement **EVERY MONTH**

21831 - Cleanwater

The thin coating of the filter media acts as a MECHANICAL FILTER for fine particles, which must be removed after use and composted\*.
