**Project Designation:** Productive Innovation :: COVID-19

**Project Code:** POCI-02-08B9-FEDER-071748

**Main goal:** OT 3- Strengthening the competitiveness of SMEs

**Region of intervention:** North

**Beneficiary:** Aquatlantis- Produtos para Animais Domésticos, S.A.

**Approval date:** 19 August 2020

**Starting Date:** 19 August 2020

**Conclusion Date:** 18 February 2021

**Total Eligible Cost:** 2.336.282,50 euros

**European Union Financial Support:** FEDER – 1.518.583,63 euros

**Objectives, activities and expected/achieved results:**

Result of the spread of COVID-19, the use of personal protective equipment (PPE), for health professionals and the population in general, and the access to disinfection agents, caused the lack of these products, inversely proportional to their demand in national and international markets. Companies have been trying to reinvent themselves and, jointly, give an effective response in the fight against the pandemic, reconverting the production lines for the manufacture of essential PPE.

Aquatlantis developed this project to contribute to the availability of equipment to support the fight against the pandemic in the market requiring, for this, productive investments with a view to adapting its production.

In this sense, the present project aims to adapt the Aquatlantis production line, with the manufacture and commercialization of individual protection equipment, as well as antiseptic solutions and disinfectants for cleaning/sanitizing alcohol-based multi-surfaces.

Thus, it is estimated that the results to be achieved within the scope of the project will correspond to the development of 11 relevant products (goods and services) within the scope of COVID-19.
